INDUSTRIAL AIR COMPRESSORS

415 Volt Air Compressors

Outstanding Value

Senator 415 Volt air compressors offer an excellent value choice for small to medium industrial applications. The range includes the most popular 4 to 7.5 kW (5.5 to 10 hp) sizes. Designed and built for Australian conditions, Senator compressors have a proven reputation for affordable performance, quality and reliability.

→ Features

- Twin or triple cylinder, slow running compressor pump with durable cast iron crankcase and cylinders.
- Alloy cylinder heads offer improved cooling and high flow performance.
- High efficiency MEPS-compliant, alloy frame motor uses less electricity.
- Fully automatic on-off motor control with built-in overload protection.
- Oversized air tank provides ample storage and steady output pressure.
- Pallet foot mounts enable safe forklift handling and secure installation.
- Sturdy all-metal, fully enclosed V-belt drive guard keeps operators safe.
- User-friendly design with easy maintenance access to all components.
- One-year parts and labour warranty with genuine spare parts available.
