

## 1/2" IMPACT WRENCH

# THE ULTIMATE AIR GUN IS HERE!

1,100 ft-lbs. of nut-busting torque\*

### 2135TiMAX

To create the ultimate air gun we started out with a blank sheet of paper. That's why pound for pound; no other gun even comes close to the power and performance of our new Ingersoll Rand 2135TiMAX. The first time you pick it up, you'll see and feel the difference.

It all starts with titanium, which allowed us to create a compact 1/2" ultra-duty design that offers unbeatable strength and durability. Best of all, since it weighs just 1.79 kilos, your arm won't feel fatigued after a long day.

And talk about power!

The seven-vane motor delivers nut-busting torque that will loosen a nut tightened to 1,100 ft-lbs. – in 6 seconds! But power isn't worth much if you don't have control. That's why the 2135TiMAX features easy-to-use forward/reverse pushbuttons, a professional touch trigger for smooth power delivery, as well as an ergonomically designed handle and grip.

Titanium 'n' torque. The combination will blow you away!

DRIVE	1/2"
TORQUE RANGE	50 - 600
NBT* (ft-lbs)	1,100
