

RAMBOR MESH MUNCHER

KEY FEATURES

The NEW Rambor Mesh Muncher has been designed and manufactured as an extremely strong light weight and portable handheld support machine primarily used for the safe, easy lifting and support of lightweight mesh while bolting operations are performed

- Lightweight at 17kg with lifting handles providing for safer manual handling
- Robust construction allows for consistent operation under extreme conditions
- Allows two handed gripping of the mesh muncher by a single operator
- Non dumping of air leg is air supply is cut from Mesh Muncher
- Safety yield valve in place in cash of pressure build up or excessive load
- Can be custom made to suit your needs
